Inland Empire Oncology Nursing Symposium

October 28-29
2011

Valley Hospital & Medical Center
Spokane Valley, WA
Course Description
During this two-day symposium, attendees will benefit from an intimate learning environment in which local oncology experts will provide the basic knowledge and understanding of the nursing principles needed to become a certified oncology nurse or retain your current certification.

The course will provide an overview of the major types of cancer and their treatments. Long term side effects, pain management, interventional radiology, and palliative care will all be discussed. In addition, the symposium will focus on why oncology nurses are so critical to patient care.

Intended Audience
This symposium is designed for nurses and other health care professionals dedicated to the field of oncology, particularly those nurses who are preparing to become certified or those who need hours towards recertification.

Accreditation
Contact hours for this continuing nursing activity have been submitted to the Washington State Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation. Please contact Emily Fleury at Community Health Education & Resources for more information about contact hours.

Cost
$100 includes lunch both days. Registrations are accepted until October 26, 2011. Space is limited, register early.

Agenda

Friday: October 28, 2011

Course Objectives

1. Identify the role of the oncology nurse in the management of chemotherapy-related emergencies.
2. Discuss the diagnostic work-up for patients with early and advanced breast cancer.
3. Explain why pain control remains a high priority in cancer care treatment.
4. List the components of the survivorship care plan.
5. Discuss the therapeutic agents used in cancer therapy.
6. Identify new advances in the field of Radiation Oncology.
7. Identify a strategy for interpreting a family health history to assess cancer disease risk.
8. List the risk factors that increase the chance of developing multiple myeloma.
9. Discuss nursing care issues in the treatment of hormone refractory prostate cancer.
10. Discuss the pathophysiology of renal cell carcinoma.
11. List the types of stem cell transplant.
12. Identify the latest minimally invasive therapies in interventional radiology.
13. Discuss the proposed role of HER2 in gastric and GEJ cancer.
14. Explain why radiosurgery is a viable alternative to other cancer treatment options.

Community Health Education & Resources (CHER) is a service of Inland Northwest Health Services (INHS). INHS is a non-profit corporation in Spokane, Washington providing collaboration in health care services on behalf of the community and its member organizations Providence Health Care and Empire Health Foundation.
